DISAPPOINTING

October 31, 2014

The entire book is just half a dozen of pages. Very superficial and few information. The sample provided in the kindle store shows you only 2 pages and now I see it is half of the book content. After 3 minutes I returned it for a refund.

Reviewed Around The World In 80 Gardens Box Set [DVD] ...

A TRAVEL AROUND THE WORLD FROM ONE GARDEN TO ANOTHER

November 05, 2013

The ideas presented by Monty Don are just wonderful. He makes you understand peoples culture by visiting their gardens. He speaks with passion for the subject that touches any watcher. If you are a garden enthusiast -and I bet you are to buy such a DVD- you will find some hours of fantastic entertainment. The quality of the work is very good. Aerial footage, good interviews, some insights of the country and major cities, good background music, in a word a very weldone work. The missing star is that I found nearly a dozen of the 80 gardens that could not be called exactly a garden. Some look more as plants deposit. But even visiting those 'gardens', Monty manages to make you feel a special guest. I recomend this wonderful work.

A NICE SELECTION OF FARMS IN A WELDONE BOOK!

August 19, 2013

I have visited myself at least 15 lavender farms in US. Many of those deserve to figure in the book but were not included. Although all that are in the book that I had the chance to see are definitely among the best. I understand that the selection was done very carefully. If some were not in on the other hand those that are shown occupy a good number of pages and at least half a dozen of photos very big(some use the whole page). By the way, the pictures are awesome and very attractive. The shots have a professional touch. The text include recipes, lavender life style, thoughts from the owners of the places and a good report about the farms. Resuming a nice work and I am fully satisfied with the book. I do recommend it.

Reviewed Self-Discipline in 10 Days: How to Go from Thinking to Doing ... by Theodore Bryant

4 of 4 people found this review helpful

Straight to the point

April 24, 2013

The author offers a very much psychological approach, which turns the content of the book a very efficient one. Many good tips and advices to improve self-discipline. The book is certainly inspiring and gives you a good kick on that way. Besides the text is straight to the point and you dont waist time with long stories and examples. It keeps essential and thats it. I enjoyed this quick and practical approach and my self-discipline got improved in just a few days. I recomend it.

Reviewed Organize Now!: A Week-by-Week Guide to Simplify Your Space and Your Life ... by Jennifer Ford Berry

1 of 2 people found this review helpful

Chosen by the 1st. chapter. The content did not correspond.

January 13, 2013

After downloading samples of at least 10 books on organizing and decluttering to my kindle device, I finally chose this one. The samples only show the first chapter. After buying a copy and turning over the pages of all the content I found some good ideas. That is the reason I rate it 3 stars. But in general the ideas go and return in different moments of the book. The book itself is not very well organized and not inspiring at all. I return it and bought another one.

Reviewed Gardens of the National Trust - Vol. 3 [Import anglais] ...

It is good but not inspiring!

November 06, 2013

Presented by Alan Titchmarsh, contains a selection of some National Trust's gardens. The gardens are great and are amongst the most famous in England. Although the shootage is just enough in quality and the whole work is not a breathtaking one. As I am not an English native speaker I miss subtitles too. A good point is the close-ups in some particular plants with name of cultivars, etc. It is interesting for my work as a landscaper.

I WAS NOT EXPECTING THAT MUCH

October 12, 2013

Monty Don talks about history and gardens in Italy while takes you into some of the best gardens there. The script is extremely weldone; Mr. Don's coments are very good; the back soundtrack is well chosen; the phtography is good. In a nutshell, a wonderful pleasent surprise.

I DO recomend it! A very nice work.

Just good.

August 14, 2013

I found what I was looking for. The ideas are there and the pictures also. I think that the quality of the works, pictures and text could be a little better. It is a good book. I recomend it.

Outstanding

August 14, 2013

Ideas pictured in the book are fantastic. All them carefully made and very well illustrated. I am not very much fan of miniature things, but this work deserves a word or praise, A wonderful book!

Reviewed What a Plant Knows: A Field Guide to the Senses ... by Daniel Chamovitz

0 of 5 people found this review helpful

SCIENTIFIC BUT BORING

February 09, 2013

The Author makes clear that his work is the opposite of another very famous title in this subject: The Secret Life of Plants. The result is a book with less stories, much more science based information and less interesting. I found it quite boring and too much "biology text" for a lay person like me. Although it is a good book.

Reviewed Hillside Landscaping: A Complete Guide to Successful Gardens on Sloping Ground ... by Editors of Sunset Books

I do recomend

January 09, 2013

The book covers well the subject. Many good ideas and how to advice is in every page. The photos are also very good and inspiring. As I live in a plot that is plenty of hillsides I am sure I will use this book a lot. I do recomend it to anyone who lives or works with gardens and has to face slope challenges.
